This new reference on **Dilek Records** is something very particular and **out of the ordinary**. It was achieved after a long period of work in the studio, which lasted three years and was done with a lot of **heart** and **passion**. It's the **10th vinyl** release of this surprising **Swiss/Argentinean** label who is now presenting an extremely **multicultural project**. These productions are full of **diversity** and **humanity**, telling the story of an unusual encounter that led to a beautiful musical project with many influences, but mainly focused on the **dancefloor**, without complexes and **far away from the purism**.

Benedetti & Bianco is a duo born of the need for expression of **Nacho Benedetti** and **Franco Bianco**. Grabbing from the musical traditions of **Uruguay** and **Argentina**, they began remixing vinyl with **Alexi Delano** and other huge figures of the worldwide scene. Their mixes go from **techno** to music of the "**Rio de la Plata**" region, while their intention is having fun and creating something different to dance.

With this new work, they finally present their album named "**Jorge Drexler Remixes**" which is like the title indicates, a release including remixes of **Jorge Drexler's** productions from the album "**12 Segundos de Oscuridad**". This project is audacious, full of captivating sounds and it also includes two amazing collaborations of **Mike Shannon** and **Jesper Dahlback**, who are very talented, well known and respected artists with a long career behind them. Their work is very solid and balanced; it's an honor to have them on board of this new reference, which means a lot to everyone who participated.

This release will be available on **vinyl** as well as in **digital** format including **bonus tracks** and later on also in **CD**, with even more **unedited** material! Listen to these tracks and have the opportunity to discover something totally **different** with some of Jorge Drexler's **uncut material**. Close your eyes and enjoy **this moment**.
